

Registration of Over 20kg Models

Before commencing construction of an Over 20kg model it is essential that you register your project with Tony Hooper MBE. He will then appoint an Inspector to oversee your project who will also carry out the Final Inspection to enable the LMA to issue a Certificate of Design and Construction which is used by the CAA as a basis for issuing an Exemption to Test Fly.

Please note that if you not a member of the LMA then there is an admin charge of £30 and you are required to pay the Inspectors travelling expenses. Consequently it is much better financially if you join the LMA!

The basic details required are:-

Name	Date
Address	
Postcode	LMA Membership No
Model Type	Scale
Wingspan (mtrs)	
Length (mtrs)	
Estimated final Wt (kg)	
Engine(s) in cc size	

Please download and post this form or send it by E Mail to: -
